

## **Are your feet ready to come out of hibernation?**

Escents Aromatherapy provides all-natural DIY spa care to get feet sandal-ready

**Vancouver, BC March 17, 2010** – Escents Aromatherapy, the Canadian owned-and-operated manufacturer of natural aroma-based bath and body products, launches a simple 2-step program to get feet ready for spring from the comforts of home.

“Even though there are signs to show cautious optimism with regards to the economy,” says Jacqui MacNeill, CEO of Escents Aromatherapy. “We are all still looking for ways to save money and simplify our lifestyle. For me, that includes cutting back on my usual mani-pedi appointments and opting to pamper my digits from the comforts of home.”

Escents offers two all-natural products that help exfoliate and regenerate skin cells with the help of Peppermint and Eucalyptus essential oils.

1. Step one is to rid your feet of all the dead skin cells acquired over the long winter months. The Revitalizing Foot Scrub uses pumice and natural oceanic clay to exfoliate and draw out toxins from the body. The essential oils are both antibacterial and antifungal and will also work to cool and refresh feet.
2. The second step is to lock-in moisture. The Revitalizing Foot & Leg Lotion is full of natural ingredients like Jojoba Oil and Wheat Germ Oil rich in proteins and minerals that work to penetrate extra dry skin and reverse the signs of ageing. The same blend of Peppermint and Eucalyptus is used in this hydrating base, stimulating blood flow and circulation to the affected area.

DIY spa care is becoming more mainstream as we reevaluate the lavish lifestyles enjoyed in years past. Escents not only boasts a vast selection of natural pre-blended aromatherapy products that can be enjoyed without a \$200 price tag, but also offers 16 unscented spa products that can be custom blended to suit your individual needs. Visit any Escents retail location to whip up your own unique spa products at the Escents Blending Bar and indulge in spa-luxury without breaking the bank!

### **About Escents Aromatherapy:**
